PROFESSIONAL EXPERIENCE

Cloud Solutions Architect, Generative AI & Agents | **Microsoft** Feb 2025 - Present

- Lead end-to-end enterprise AI engagements, translating customer problems into use cases and AI adoption roadmaps, taking them from discovery and POCs through solution architecture, production readiness and adoption across Copilot, AI agents and Power Platform.
- Partner with account teams throughout pre-sales, helping shape and position AI offerings, building technical value propositions, and defending proposed solutions with C-suite and technical stakeholders.
- Designed an accessibility-first Copilot adoption program for a major organization serving blind and low-vision users; learned JAWS (screen reader software), adapted workflows and enablement, and worked with product teams to surface deployment blockers and customer feedback, contributing to accessibility improvements and helping drive license purchases to 3x the initial target.
- Built reusable deployment and adoption tooling for 50+ customers, including enterprise accounts: deployable segmented usage dashboards, communication planning tools and web-based learning products to accelerate adoption across different user groups.
- Lead Microsoft Aspire Education, reaching 3,000+ university students through AI, technology and career programs.

Technical Editor | **neptune.ai (acquired by OpenAI)** Sep 2024 - Sep 2025

- Authored and edited technical content on LLMs, RAG systems, prompt engineering and responsible AI for an ML publication reaching 200K+ monthly visitors, translating complex concepts into practical guidance.

Business Intelligence Engineer Intern | **Amazon** Sep 2024 - Feb 2025

- Built SQL-based ETL pipelines and analytical tooling alongside ML engineers; contributed to a 14% improvement in vendor negotiations.

Machine Learning Researcher | **Universidad Carlos III de Madrid** Oct 2021 - Jun 2024

- Reduced a multi-source data-ingestion pipeline runtime by 28% and developed NLP pipelines using topic modeling and word embeddings for a job-to-degree recommendation system.

Data Scientist Intern | **Accenture** Jan 2023 - Jul 2023

- Contributed to a supply-chain optimization system and supported 200+ stress tests for sales forecasting and inventory management.

SELECTED PRODUCT & AI PROJECTS

Adaptive Learning for Accessible Routing - MSc Thesis | Python, FastAPI, ML, OpenStreetMap

- Built an end-to-end accessible navigation product that translates user preferences into personalized pedestrian routes using real-world routing data, an API backend and an Android client.
- Designed an online preference-learning system from user choices and a reproducible evaluation framework across different profiles, assumptions and noise levels.

EDUCATION

MSc in Applied Artificial Intelligence | **Universidad Carlos III de Madrid** Sep 2024 - Present
(Expected: Sep 2026)

- GPA: 8.98/10. Relevant coursework: Probabilistic Methods in AI (Passed with Honors), Deep Learning, Multiagent Systems, Ambient Intelligence (Passed with Honors), Business Analytics

BSc in Data Science and Engineering + Minor in Economics | **Universidad Carlos III de Madrid**

- Exchange at Concordia University, Montréal. Relevant coursework: Innovation and change management, Machine Learning, Neural Networks, AI for Business

SKILLS, TEACHING & RECOGNITION

- **Enterprise AI:** Discovery, use-case mapping, solution architecture, POCs, adoption/change management, governance, stakeholder communication.
- **Technical:** Python, SQL, REST APIs, FastAPI, Git.
- **GenAI & Agents:** Agent orchestration, RAG, prompt engineering, Azure AI Foundry, Copilot Studio, Power Platform.
- **Languages:** Spanish (Native), English (C2 - Cambridge Proficiency), French (B2).
- **Teaching:** Lecturer in Data Science, AI & Agentic Systems for postgraduate programs; consistently rated 9.2/10+ by students.
- **Recognition:** Nova 111 List 2025, ACM Women in Computing Scholarship, 1st place - Google x Zara Datathon 2023.
